

RONGDE

Shanghai Rongde Engineering

Oceantech Shipping & Trading Ltd is the Official Distributor for the Greek & Cypriot Market for Shanghai Rongde Engineering & Equipment Co. Ltd,, a company which integrates scientific research and production engineering. The company is actively committed to research and development of new products, and insists on the continuous introduction of new product groups with high technology content, high market share, high added value and independent intellectual property rights.

Double acting hydraulic actuator

Electric valve

Pneumatic actuators

In 2007 Rongde has Introduced liquid level measurement systems, valve remote control systems, fire protection systems, magnet magnetic couplers monitoring & alarm devices.

Product Categories

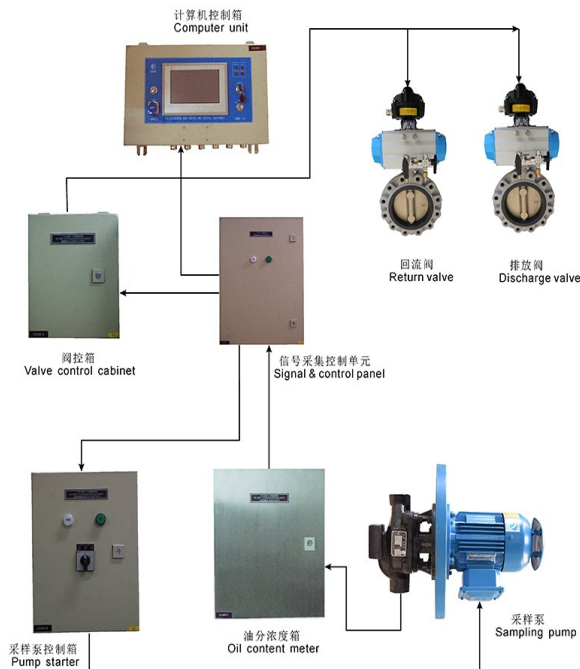

- ⇒ Valve remote control & level measurement
- ⇒ Liquid level monitoring and alarm device
- ⇒ Anti-pollution equipment
- ⇒ Fire fighting equipment
- ⇒ Magnetic coupling & speed control device
- ⇒ Intelligent monitor system
- ⇒ Energy saving equipment

Float Level Sensor

The float type liquid level measuring device can be used not only for **ballast water tanks**, fuel oil tanks, draft meters ,but also for measuring the liquid level of the cargo tanks, displaying temperature and steam pressure, and also issuing an alarm signal when the value exceeds the set limit.

Magnetostrictive liquid level sensor

RD-ODME-IIA oil drain monitoring system

Oceantech Shipping & Trading Ltd. can assist your technical department by presenting Rongde product portfolio, provide 24/7 after sales support, monitor the installation and offer you every kind of spare
